

## Primera PL400e pouch labeler

The PL400e pouch labeler is the ideal semi-automatic labeling machine for companies wishing to apply labels to unfilled pouches. The PL400e is designed for maximum precision and efficiency, ensuring that labels are always placed in the same place on each pouch.

The PL400e's design ensures that labels are applied at the right speed and with optimum precision, reducing the risk of errors. The result is an excellent finish that enhances and professionalizes the appearance of your products.

Thanks to its ease of use and robust design, the PL400e makes the labeling process simple and efficient, even for users without any technical experience, as this labeler is extremely easy to operate. Everything is designed to save time and reduce errors, offering you effortless, professional operation. It's a compact, sturdy machine made entirely of metal, making it perfectly adaptable to small workspaces and large production environments.

### Label quickly and accurate!

Speed and precision are the words that sum up this labeler perfectly. With the PL400e, you can apply up to 1,300 labels per hour. The labels are placed perfectly and wrinkle-free.

This machine allows you to save different programs. In fact, the PL400e lets you easily define nine specific label positions, adapted to different bag sizes and types. This makes switching from one product to another quick and efficient. This model features movable guides to ensure your pouch stays in place for precise label placement.

### Benefits

- Quick installation and easy operation
- Rewinder Liner
- Precise application of front and back labels on pouches
- LED display with integrated counter
- Apply labels to your bags quickly and accurately, up to 1.300 labels per hour
- Suitable for bags of various sizes and materials - also works with zipped and resealable bags
