

Primera LX4000e color label printer

LX4000e Color label printer with larger ink reservoirs

The LX4000e combines the advantages of printers with replaceable print heads with those of separate ink cartridges. So you always have the best quality at the lowest possible printing costs. The printer has the same quality features as the reputable LX910e. The big difference is that the user can not only change the print head, but also the color tanks CMY (Cyan/Magenta/Yellow) can be changed separately. Moreover, the printer exists in 2 versions. Thus, you can choose the Dye version with the highest quality. But you can also choose the pigment version that offers the highest resistance. Does your application or need change afterwards? No worries, you can always convert the printer yourself to use the other inks.

Create your own product labels with the Primera LX4000e color label printer

The LX4000 Color Label Printer with Big Ink uses the same system and reliable operation as Primera's popular LX910 Color Label Printer. The difference is in the addition of larger, individual ink tanks and the reusable thermal inkjet printhead. The innovative ink reservoir system allows users to effortlessly check the ink level without ever having to open the printer cover.

This color label printer prints borderless, photo-quality images and barcodes on highly water-resistant and scratch-resistant labels. Both dye and pigment inks are available and are optimized for brightness, durability and optical density. Your labels can include full-color photos, illustrations, graphics, text and barcodes. Print them when and where you need them, in quantities you can actually use!

Low cost per print and easy installation

With large ink tanks and a reusable printhead, the LX4000's cost per label is one of the lowest in the industry. From initial installation to full operation, the LX4000 is easy to use. Plus, everything you need to print labels is included in the box.

Each LX4000 comes with BarTender® UltraLite software, a sample roll of high-gloss labels, a reusable dye or pigment printhead, dye or pigment CMY ink tanks and a USB cable. You print full-color labels within minutes of taking the printer out of the box.

Benefits of the LX4000e:

- **High print speed** - max 114mm per second
- **Individual ink tanks** - CMY with pigment inks or dye inks
- **Larger ink cartridges** - lower cost per label
- **Cutter** - integrated label cutter (like pizza wheel)
- **Best print quality** - up to 4800 dpi

Primera LX4000e color label printer

Specifications

Print methode	Thermal inkjet; Dye or Pigmented ink
Print quality	To 1200x4800 dpi
Print speed (per second)	Quick: 114mm Normal: 46mm High quality: 20mm
Print head	Replaceable Multi-Use Print Head
Inks	Individual ink tanks for Cyan, Magenta, Yellow, Process black
Colors	16,7 million
Color management	ICC color profiles
Max. printing width	13mm – 210mm
Media width	38mm – 212mm
Media Types	Pressure-sensitive labels on roll, labels on roll, folded labels or labels
Media sensor	Movable sensor for punched-out labels; reflective sensor for labels and tags with black-mark; or printing in continuous
Supply Roll	Max. 152mm diameter on a core of 76mm
Ink level	Calculates actual number of remaining prints based on the ink consumption of the images being printed.
Control system	Windows 7/8/10+ (Coming Soon – MacOS 10.11+)
Interface	USB 2.0; Ethernet
Software	Nicelabel SE Primera Edition and Seagull Scientific Bartender® UltraLite Software Included. Can be used with most known label software and graphics programs
Electrically powered	12VDC, 5.0A
Power supply	100-240VAC, 50/60 Hz, 60 watts
Certificates	AL, UL-C, CE, FCC Class A
Weight	16,6 kg
Dimensions (W x H x D)	438mmW x 231mmH x 438mmD
